PHONE HOME

If you are living in another country while you are studying, you will probably want to phone home a lot and talk to your family and friends.
Use the keypad of the mobile phone and the numbers and notes below to work out *who* you want to ring and *what* you want to ring them about.
There are 3 possible letters for each number dialled.
We have given you the vowels in every word, but you need to work out the rest of the letters.
For example, if you dial 1, the letter could be B or C, so you need to try two combinations. And remember – the same number twice doesn't have to be the same letter twice. Get dialling!
